Attractive because one of the objectives of the project is to raise consumer awareness when it comes to behaviour in homes. A set of ICT-based solutions provide attractive personalised information on energy use, indoor environment, health, and lifestyle. This is for example a gamification platform, virtual reality, energy and 3D modeling. Attractiveness is reflected in some of the elements of the gamification feature.

Acceptable means that by using the TripleA-reno decision support tools (i.e. dynamic and user-centric business models) users can tailor their renovation and make informed and economically-wise decisions. In TripleA-reno affordability reflects the idea of the business model, cost savings for the user and the holistic idea of “user in the center”.

Affordable refers to the TripleA-reno user-centric approach. The project aims at getting the “renovation motor running, with the end-user in the driver’s seat”. TripleA-reno will involve a various set of users in the co-designing processes, and keep a constant communication flow between consumers and developers to assure design of people-centered products.

TripleA-reno
Renovating Europe for its citizens

TripleA-reno is a EU funded project, running from May 2018 until April 2021. Building upon results from previous European projects, TripleA-reno focuses on consumers’ and end-users’ requirements. The project team works on better indoor environmental quality and indoor health for occupants through well performing nearly zero energy renovations.

This project has received funding from the European Union’s Horizon 2020 research and innovation programme under the grant agreement number 784972. The European Union is not liable for any use that may be made of the information contained in this document, which is merely representing the authors’ view.
Improving performances of deep renovation by enhanced quality control, supported by targeted CPD (continuous professional development) and training, addressing the entire value chain in a cross-trade multidisciplinary approach

To foster new consumer and end-user centered business models and decision support tools, using evidence-based performances that facilitate decision-making

Objectives

Providing consumers and end-users of deep renovation projects with attractive, understandable and personalized information of realized real performance

To demonstrate the benefits and evidence-based solutions in live demonstration cases

To roll out the results on a wider European scale by in Triple A-Reno involved European interest groups and umbrella associations

Building upon results from a number of relevant European projects, TripleA-reno aims to achieve a set of specific measurable qualitative objectives.
